

■ Our values.

1

Change culture

We work to accelerate our future

2

Continuous improvement

There is always a better way

3

Sustainability

We work for the future of our foundation and society

4

Care for people

People are LINKS' real wealth

5

Trust

I'm OK if you're OK

6

Belonging

From ME to US

7

Sharing

Together we are stronger

8

Proactivity

We are resourceful and we stand up for it

Fondazione LINKS.

Fondazione LINKS was born as a joint initiative of Compagnia di San Paolo Foundation – the largest Italian bank foundation – and Polytecnico di Torino – a prestigious Engineering and Architecture University – with the idea of building a “vehicle” for innovation, a center operating in applied research and technology transfer: **a bridge between fundamental research and the market.**

LINKS has been working for 20 years on national and international projects and originates from the merger of two pre-existing research Institutions, the Istituto Superiore Mario Boella (IMSB) and the Istituto per i Sistemi Territoriali Innovativi (SITI).

Mission The mission of LINKS is to lay the groundwork for **the development of innovation projects with a high socio-economic impact** by leveraging on knowledge, cutting edge technologies and strong skills in managing projects and building prototypes.

Vision Fondazione LINKS aims at contributing to build an **ecosystemic vision of progress** based on the recognition of the strong connection between society, nature and technology.

The strategy of LINKS is built on three main pillars:

1. Help companies adopt innovative technologies and facilitate their dialogue with research institutions.
2. Generate positive impacts on P.A., education, third sector and culture by using technologies and innovative processes and models.
3. Act as a “hub”, a reference center generating ideas, vision and talent.

Our Innovation.

We master technical-scientific disciplines in digital technology and regional development such as:

10101

Artificial Intelligence

Connected Systems & IoT

Cybersecurity

Advanced Calculation Modelling

Satellite Systems

Etc.

Working on innovative projects in many application fields:

Industry 4.0

Intelligent Mobility

Agritech

Robotics

Cultural Heritage

Etc.

Our organization.

LINKS acts as facilitator for the innovation ecosystem in its target territory. Its operational structure is divided in Research Domains and Organizational Units.

Advanced Computing, Photonics & Electromagnetics

Future Cities & Communities

AI, Data & Space

Innovation in Culture, Society & Public Administration

Connected Systems & Cybersecurity

Strategic Marketing & Innovation Services

LINKS also established the **Chief Technology Officer (CTO)** function, having the goal of summarizing the results gained by the different research teams and promoting synergies among them. The CTO also establishes and maintains contacts and relationships with companies and strategic partners of LINKS. The strategic advisory team of LINKS supports managers and decision makers of companies in the evaluation of the opportunities coming from exponential technologies, the Web3 paradigm and the emerging business models of Tokenomics.
